DETAILED ACTION

1. Claims 1-29 are presented for consideration.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1 and 25 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. It appears claims 1 and 25 would reasonably interpreted by one of ordinary skill as a system of software, failing to fall within a statutory category of invention. The claims call for "apparatus" or "system" that comprises "start code detector", "pipeline", and "decoder", and in the context of the disclosure and claims in question, one of ordinary skill would reasonably interpret these terms as software. As such, the system of software alone is not a machine, it is clearly not a process, manufacture nor composition of matter [Please see MPEP 2106].

Claim 19 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. It appears claim 19 would reasonably interpreted by one of ordinary skill as a software means, failing to fall within a statutory category of invention. The claim calls for "decoder" comprising "means for receiving", and "means for detecting", and in the context of the disclosure and claims in question, one of ordinary skill would reasonably interpret these terms as implemented in software. As such, the system of software alone is not a machine, it is clearly not a process, manufacture nor composition of matter [Please see MPEP 2106].

Claim Rejections - 35 USC § 112

3. Claims 14 and 19 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps or elements, such omission amounting to a gap between

Art Unit: 2454

the steps or elements. See MPEP § 2172.01. The omitted steps or elements are: convert the stream of video data into stream of data tokens, wherein the stream of data tokens comprise first plurality of data tokens that are associated with video data encoded in the first format and second plurality of data tokens that are associated with video data encoded in the second format.

44. Applicant's arguments with respect to claims 1-29 have been considered but are moot in view of the new ground(s) of rejection.

28. A shortened statutory period for response to this action is set to expire **3 (three) months and 0 (zero) days** from the mail date of this letter. Failure to respond within the period for response will result in **ABANDONMENT** of the application (see 35 U.S.C 133, M.P.E.P 710.02, 710.02(b)).
